TECH STACK

Programing languajes

Front-end
HTML, CSS, Javascript, Typescript, Wordpress

Back-end
Node.js, python and Php

SQL & NoSQL Databases
Mysql, PostgreSQL, SQLlite & MongoDB

Frameworks

Angular, Ionic, Capacitator, React.js, ASTRO & Tailwind

Tools & Technologies

OS
Windows, Ubuntu, RedHat, Debian, Raspberry Pi

Infraestructure tools
Dynatrace monitoring and alert management, PKS, dockers, LXC containers, Landing Zones (Spokes and Hub management) & Brokers implementation

Software
Visual Studio Code, Postman, VMWare, Oracle VirtualBox, DBeaver, etc..

EXPERIENCE

GEOPOST S.L, Infrastructure Engineer || Front-end Developer

I am responsible for the installation and maintenance of the company's infrastructure, as well as the front-end development of the company's website. Additionally, I have led process automation projects and developed microservices, certificate automation, and an alerting system. I also manage the infrastructure on platforms such as OpenShift, Azure, OCI, and PKS. Furthermore, I oversee Jira administration, platform maintenance, and the creation of automation workflows to optimize operations.

I also have experience in front-end development, having built a corporate application called GEDDIS using Angular 19, Ionic, and Capacitor for mobile development. This application integrates with our APIs to manage and monitor services, generate real-time analytics and visualizations, and track operations within our Jira system, enabling efficient control of projects and tickets.

• Oct 2024 - Now, Madrid, Spain

INDRA Systems, ATM Systems Technician

Wondo was acquired by Whim, where I co-led the creation of the first design system, streamlined workflows, revamped the homepage, and led the integration of SwissPass in Switzerland. Additionally, I was part of the team responsible for integrating new providers.

• March 2023 - Jun 2024, Madrid, Spain

Infibail Ibérica, IT Technician
